

# Nestbox HeatShields

**Note:** The HeatShield could be made entirely of molded plastic

HeatShields for bird houses of cavity nesting birds

**Back Shield:** 1/8" plywood or plastic  
Width – full width of nestbox back  
Height – full length of nestbox back

**Top Shield:** 1/8" plywood or plastic  
Width – full width of roof  
Depth – from front edge of nestbox roof to back (less spacing required for hinge to fully open if top opening).

**HeatShields** may be installed on any nestbox. 1/8" plywood or plastic shields, or similar material, are installed on all 4 sides and top. Each shield is installed with at least 4 spacers (1/2 to 3/4" long x 1/4" diameter plastic tubing mounted with 1 & 5/8" wood or sheetrock-like screws) to provide air flow between the shield and Nestbox. All shields can be full-size except the shield on the top or side that opens for inspection & cleaning. That shield may be reduced in size as necessary to allow for opening and design of box.
